Opportunities for Business Involvement

Advisory Committee Member

Become an integral part of the design and construction of the curriculum for an individual strand. Meetings will occur at least twice a year to oversee progress and make revisions.

Guest Speaker

Bring your industry experience to life for students by sharing your wisdom, business experience, and company opportunities.

Internship

Offer students real-life integration into the industry where they will be on-site and expected to contribute to the company. The length of time can vary based off the needs of the company.

Job Shadowing

Allow a student or students to shadow current employees to provide a more in-depth experience within the industry.

Mentor

Become a mentor willing to help problem solve through an e-mail, phone call, or a meeting with a student or students.

Project Opportunity

Take a problem off your to-do-list, by proposing it to students who will provide solutions that could potentially be incorporated into your business practice.

Space

If you have an unused space where the program can meet, help make students' learning and experience happen in the workplace.
